

**Assunto:** Inquiry for participation in a project - From Chalmers University, Sweden

Dear all,

I would like to ask you to either participate or to eventually direct us towards a more suitable partner for a new project with the topic:

**1. for Water Treatment, Reuse, Recycling and Desalination;**

In the call below:

[http://www.waterjpi.eu/index.php?option=com\\_content&view=article&id=351&Itemid=769](http://www.waterjpi.eu/index.php?option=com_content&view=article&id=351&Itemid=769)

The eligible participating countries you can find on the website under "Who can apply?", hence the reason you are contacted. It is a two stage project, thus in the first stage we do not have too much work to do, thus the **deadline of 4th of May** is reasonable. The project duration we will aim is 36 months.

Please have a look on the table with the eligible countries where you can see your national contact points, the eligibility criteria and the maximum amount you can ask/project.

If you will be the participant, I suggest that you contact your national contact point and have a short chat about how the process is going and if it is ok that you participate in this project.

I would appreciate a fast answer, **no later than next week, 20th of March**, so we can start working or re-think the consortium.

As soon as I have your answers, you will get a summary of the proposal how we see it right now, which will be subject to change, of course.

So far the consortium I was thinking about is formed from the following countries:

Sweden (Coordinator)

Norway

South-Africa

Romania

Portugal

I have been communicating with our Swedish contact point and we have the green light from their part, including the coordinator role.

Please contact me asap if you have any questions or you need additional details for when you contact your agency.

Kind regards,

Teodora
