

Media Listing—GRADUATE PROGRAMMES & ENGINEERING

An ever-evolving heritage. A truly exciting future. Home to two of the world's most iconic brands. At Jaguar Land Rover we are continually redefining the benchmark for excellence and setting the standards that others want to follow. And with increasing demand and even greater ambitions, finding the future leaders of our business has never been more important than now. That's where you join the journey.

Engineering is where our inspiration, and yours, comes to life. Join us on our two-year Programmes & Engineering programme and you'll be working right at the cutting-edge – utilising the world's most advanced technologies in state-of-the-art facilities.

Enhancing our existing vehicles and shaping new ones, you'll be challenged to use your creativity and push the boundaries in everything from design and craftsmanship to power and fuel efficiency. And you'll make your impact in a huge range of areas, including body, chassis and electrical engineering, quality, testing and design.

Your journey will begin with a thorough introduction to both brands, followed by carefully planned development throughout the programme. You'll work with industry-leading experts to develop specialist, commercial and managerial skills and you'll be supported to gain professional qualifications and IMechE accreditation. At every stage, we will give you the encouragement and freedom to achieve your full potential, drive your own success and bring our vehicles to life.

As you'd expect from one of the world's most revered organisations, an outstanding range of rewards and benefits await those who have the vision and drive to continue our global success – including a competitive starting salary, joining bonus, pension scheme and discounted car purchase scheme. All this and more makes Jaguar Land Rover an excellent place to start your journey and build a world-class career.
