

Sustainable Construction Platform

Rita Moura

TEIXEIRA DUARTE

Construction represents

6%
 of global GDP

World Economic Forum

2014

2030

\$17.5Tn

By 2030, worldwide construction output is forecast to reach \$17.5Tn (\$2014), some 85% greater than 2014 levels

SUSTAINABLE DEVELOPMENT GOAL 9

Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation

SUSTAINABLE DEVELOPMENT GOAL 11

Make cities and human settlements inclusive, safe, resilient and sustainable

Infrastructures

SUSTAINABLE DEVELOPMENT GOAL 6

Ensure availability and sustainable management of water and sanitation for all

SUSTAINABLE DEVELOPMENT GOAL 7

Ensure access to affordable, reliable, sustainable and modern energy for all

- INNOVATION
- COMPETITIVENESS
- SUSTAINABLE GROWTH
- COOPERATION | ENTREPRISES | UNIVERSITIES | PUBLIC BODIES

SUSTAINABLE DEVELOPMENT GOAL 4

Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

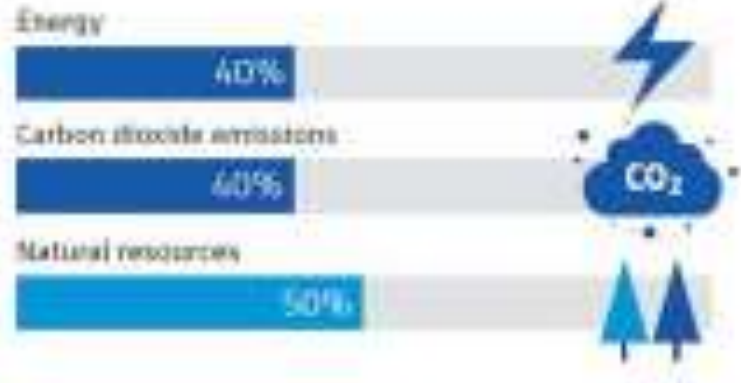

SUSTAINABLE DEVELOPMENT GOAL 8

Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

Today, our built environment utilises the world's:

SUSTAINABLE DEVELOPMENT GOAL 12

Ensure sustainable consumption and production patterns

SUSTAINABLE DEVELOPMENT GOAL 13

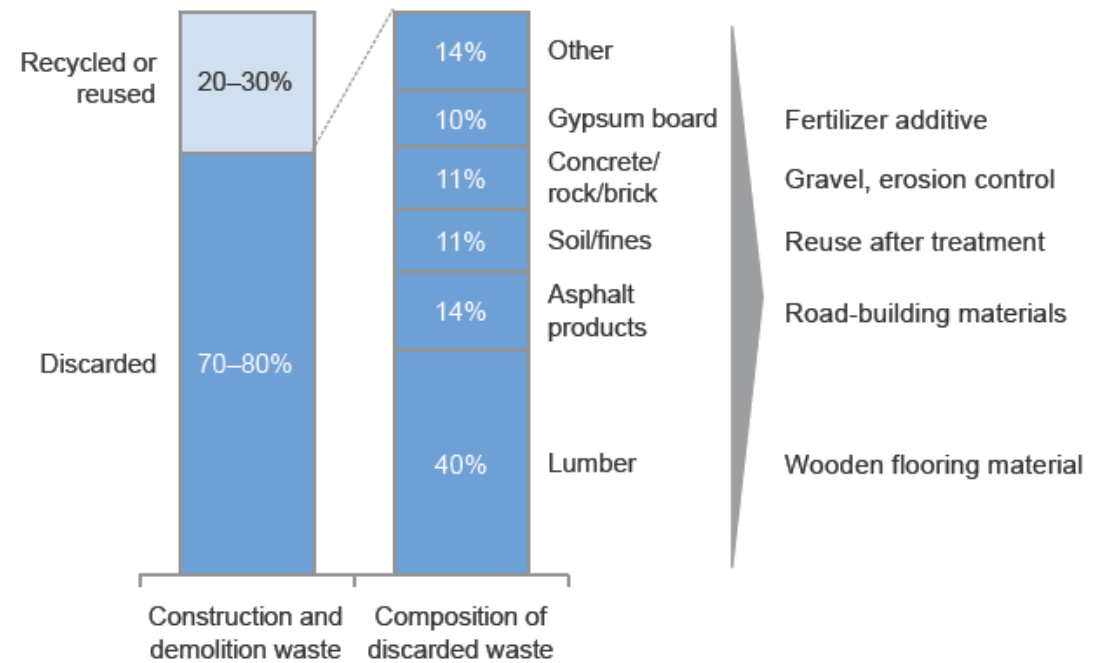

Take urgent action to combat climate change and its impacts*

Less than one-third of construction and demolition waste is currently recovered

Much discarded material could be recovered – for purposes of

BUILT CoLAB

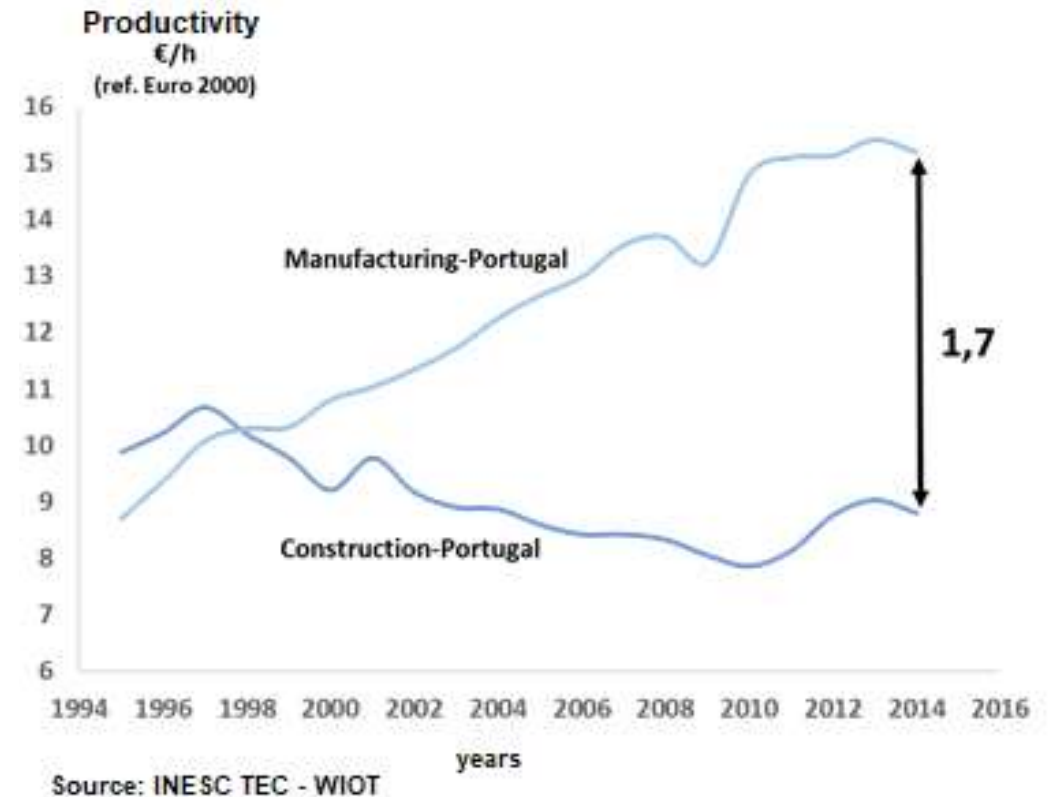

COLLABORATIVE LABORATORY FOR
THE FUTURE BUILT ENVIRONMENT

CoLAB Motivation

a) Productivity and Competitiveness

- Portuguese construction sector shows a **lower productivity** when compared with other manufacturing industries (and other European construction companies).

Construction can catch up with total economy productivity by taking action in seven areas

Cascading effect
 Regulation changes facilitate shifts in industry dynamics that enable firm-level levers and impact

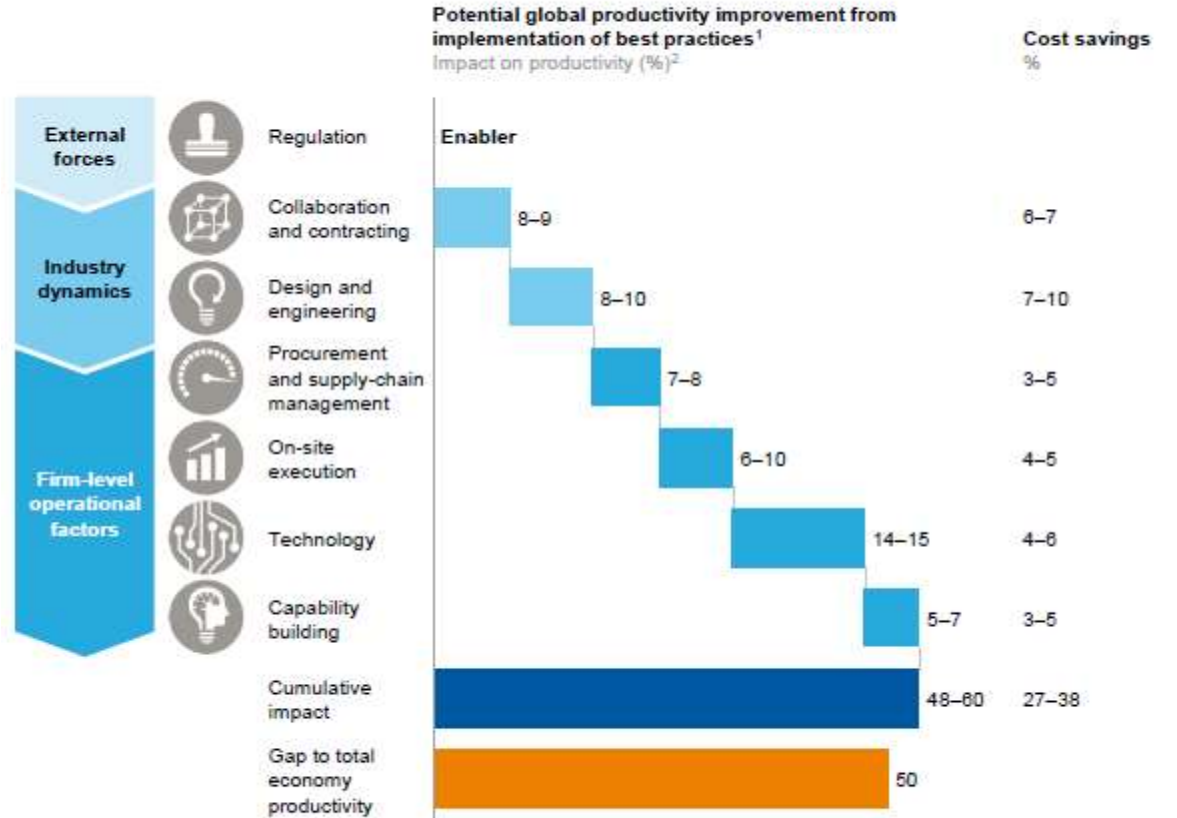

CoLAB Motivation (cont.)

a) Productivity and Competitiveness

By 2025, “full-scale digitalization... will lead to annual global cost savings of 13% to 21% in the design, engineering and construction phases and 10% to 17% in the operations phase”

BCG (The Boston Consulting Group)
 Digital in Engineering and Construction:
 The Transformative Power of Building
 Information Modeling 2016

Source: BCG Boston Consulting Group (2016)

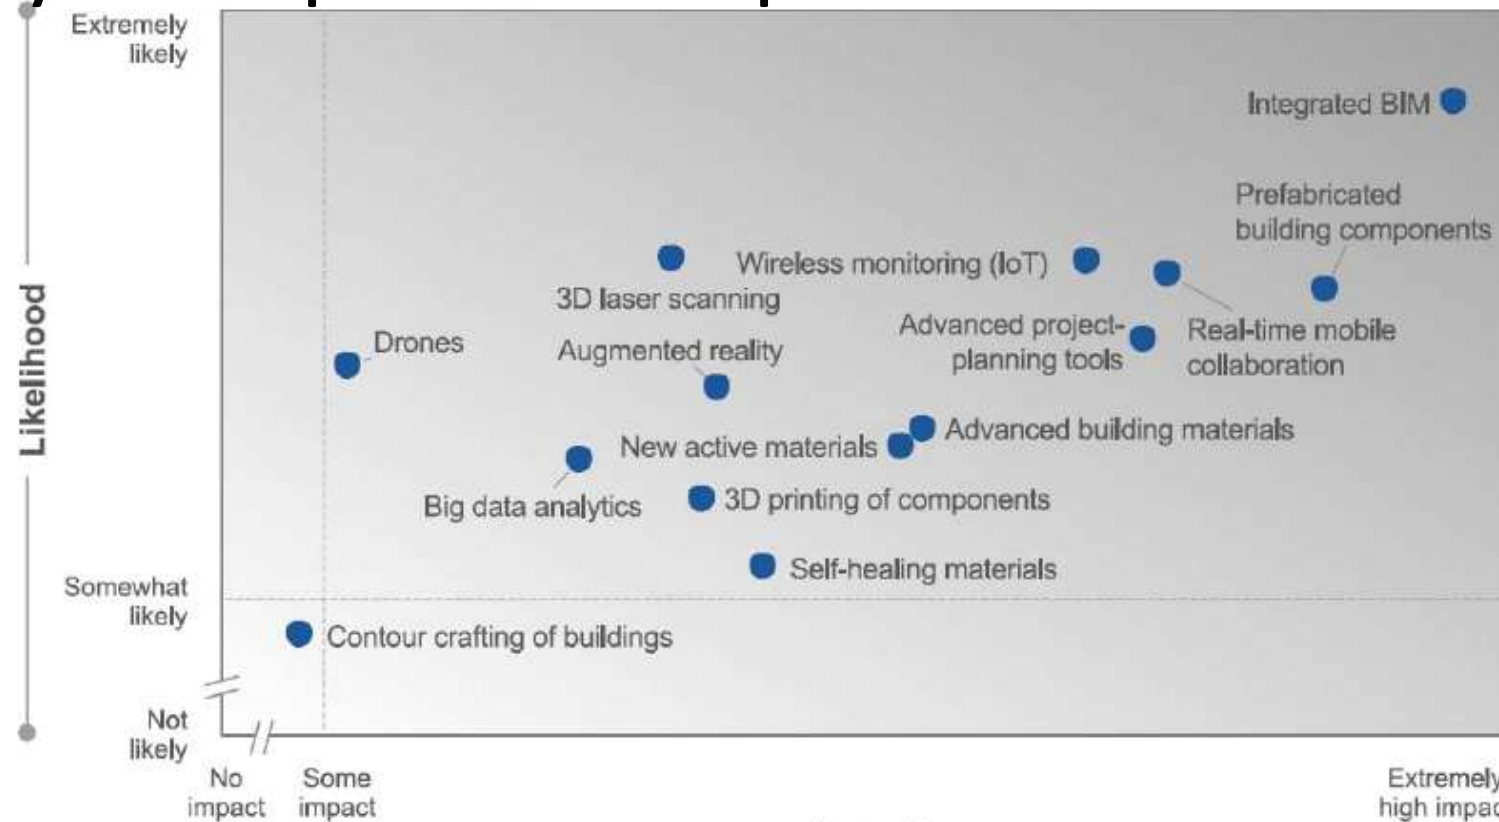

1 The Impact numbers have been scaled down from a best case project number to reflect current levels of adoption and applicability across projects, based on respondents to the MGI Construction Productivity Survey who responded “agree” or “strongly agree” to the questions around implementation of the solutions.
 2 Range reflects expected difference in impact between emerging and developed markets.

- **INNOVATION** • **COMPETITIVENESS** • **SUSTAINABLE GROWTH**
- **COOPERATION** | **ENTREPRISES** | **UNIVERSITIES** | **PUBLIC BODIES**

CoLAB Main Goals

- Bring together key **academia, companies and owners**;
- Promote the construction paradigm change to the **Digitalization Technologies**, using the **Key Enabling Technologies** (KET), such as: BIM, IoT, cloud infrastructure, data analytics, machine learning, AI, etc.;
- Promote the **professionalization of R&I in all construction industry chain**;
- Maximize the **added value of R&I** in construction chain;
- **Create high qualification and scientific jobs**, move it into the companies and **reskill the workforce**;
- Enhance **cross sectorial R&I** with other relevant CoLAB's;
- **Increase the capacity to access to** international funds and investments;
- **Create the perfect ecosystem to enhance the technological development** of the Portugal's infrastructure and building companies, towards a competitive, intelligent, resilient and sustainable **Construction Industry Worldwide**.

CoLAB Strategic Activities to Generate Innovation-to-Market

Training, Mentoring & Services

- Advanced training programs - Reskill Workforce
- Managing innovation
- Hi-tech internationalisation
- Start-up mentoring
- Fund pursuing and gathering
- Promoting participation in international forums and networks
- Design decision support policies

Technology Commercialisation

- Creating spin-offs
- Licensing support
- After-licensing support
- Design support and scale-up industrialization

Innovation & Development Research | Infrastructures | Strategy Planning

- R&I Roadmaps
- Oriented research programs and activities
- Innovation ecosystems
- Access technologic infrastructures
- Collaborative network with other knowledge areas
- Living Labs
- NZEB technologies
- Improve knowledge - from R&I to Market (companies)

Technology Transfer & Management

- Market analysis and commercial strategy support
- Scientific dissemination and brand enhancement
- IP advisory and support
- Incubator development and support
- Finding of licencees and sales partners

- INNOVATION ● COMPETITIVENESS ● SUSTAINABLE GROWTH
- COOPERATION | ENTREPRISES | UNIVERSITIES | PUBLIC BODIES

CoLAB - Research and Innovation Agenda

1. Productivity and Competitiveness

Increase productivity and competitiveness of Companies by delivering new processes and materials, and exploiting Digital Technology in design and delivery, to enable faster, less disruptive and more efficient manufacturing and construction techniques;

2. Intelligent Buildings and Infrastructures

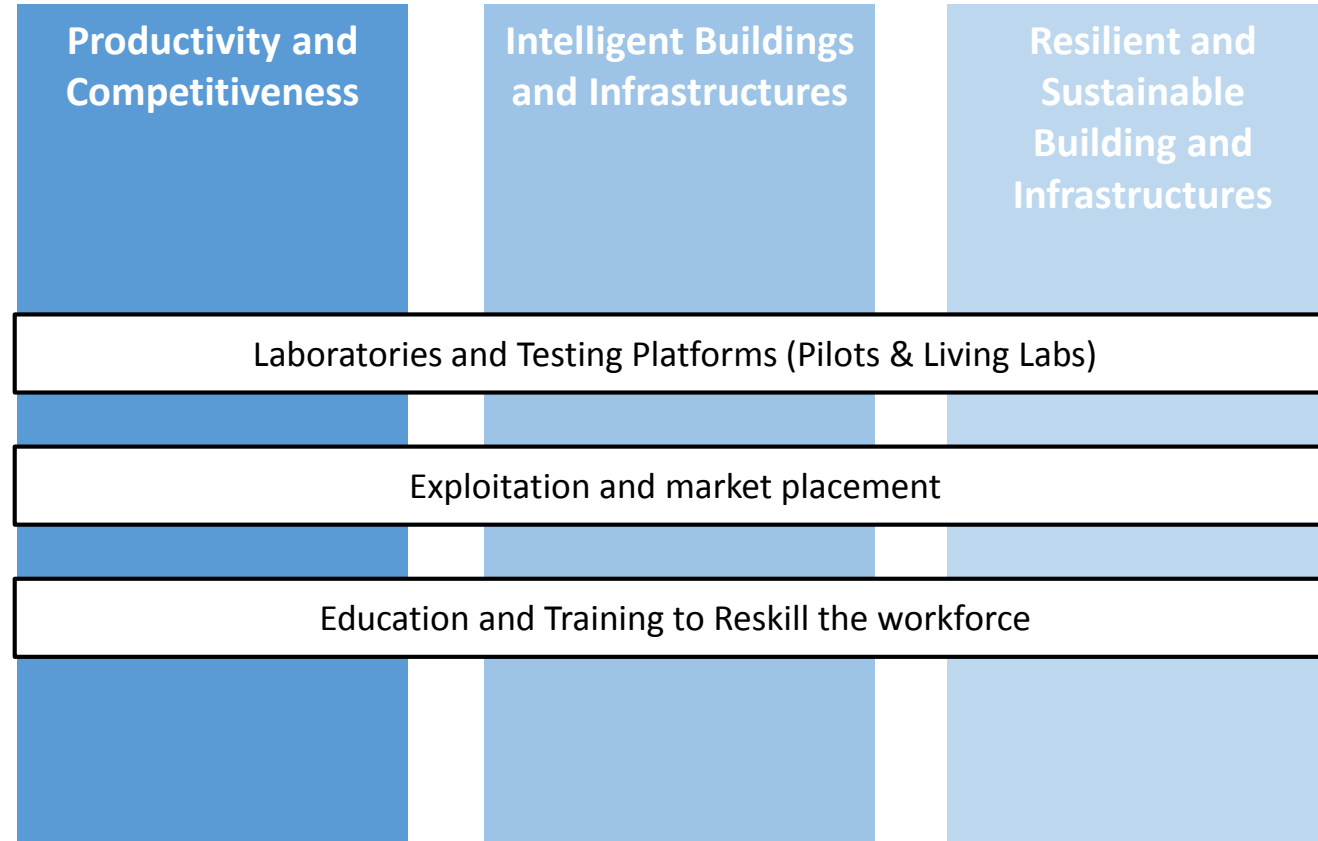

Promote the use of Key Enabling Technologies, which include BIM, IoT, cloud infrastructure, data analytics, machine learning and artificial intelligence, allow for the creation of intelligent buildings and infrastructures that provide more accurate and useful information to the infrastructure managers;

3. Resilient and Sustainable Buildings and Infrastructures

Develop new construction and management models that are efficient in the use of energy and resources, that rely on the use of sustainable and resilient materials that increase the life-cycle of buildings and infrastructures.

6 - Research and Innovation Agenda (cont.)

4. Cross Areas

- INNOVATION
- COMPETITIVENESS
- SUSTAINABLE GROWTH
- COOPERATION | ENTREPRISES | UNIVERSITIES | PUBLIC BODIES

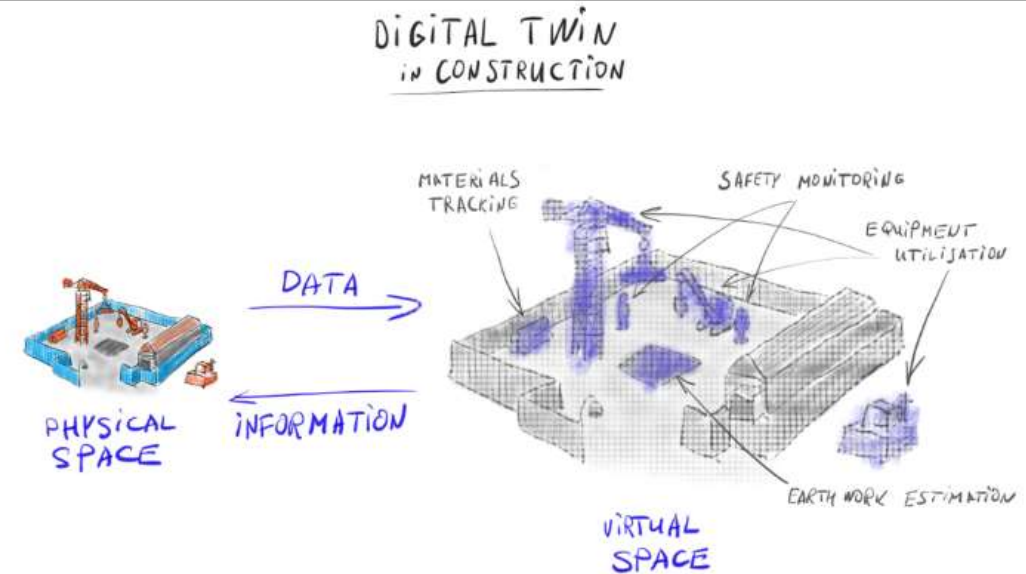

Key R&I Areas

1. Productivity and Competitiveness

- WP 1.1 – Future Construction Factories
- WP 1.2 – Design for Manufacture and Assembly
- WP 1.3 – Integration of Innovative technologies for Intelligent Construction Sites
- WP 1.4 – Digital Twin Mobile Lab

2. Intelligent Buildings and Infrastructures

- WP 2.1 – Sensing for Motorways and Railways
- WP 2.2 – BIM for Intelligent Buildings & Intelligent Infrastructure Management models
- WP 2.3 – Applications for Intelligent Infrastructures and Buildings
- WP 2.4 – Inductive Charging Infrastructures

Source: Intellectsoft 2018

Key R&I Areas (cont.)

3. Resilient and Sustainable Buildings and Infrastructures

- WP 3.1 – Adaptability and Resilience for Climate Change
- WP 3.2 – Materials for the Future Construction
- WP 3.3 – Future Construction LCA

4. Cross Areas

- **NZEB “Nearly Zero Energy Buildings”** in Portuguese Climate integrated in AEC Living Labs
- Reskill of the workforce for the Future Built Environment

BUILT CoLAB and Sustainable Development

United Nations 2030 Agenda for Sustainable Development Main Goals:

BUILT CoLAB is clearly in-line with these goals, namely the following:

9 – Industry, Innovation & Infrastructure

11 – Sustainable Cities & Communities

12 – Responsible Consumption & Production

13 – Climate Action

17 – Partnerships for the Goals

Circular Economy for the construction industry

Modular Construction

Today Modularity & Tomorrows Circularity

Construction & Built environment

*We shape our buildings and, afterwards, our
buildings shape us.*

Winston Churchill

Built environment is a determinant of where and how almost everyone lives, works and plays.

Indeed, Europe was born under the city concept, and history of these cities conform the European identity and singularity.

People on average spend nearly 90 % of their time indoors.

Transport infrastructure makes possible an interconnected and integrated Europe..

All business and social activities rely on the built environment

8th Strategic Fórum PTPC 12-12-2019 Lisbon – LNEC

Circular Construction & Energy Efficiency

More investors are interested in **sustainable investing** and adopting its principles as part of their strategy, but **Millennials are leading the charge**

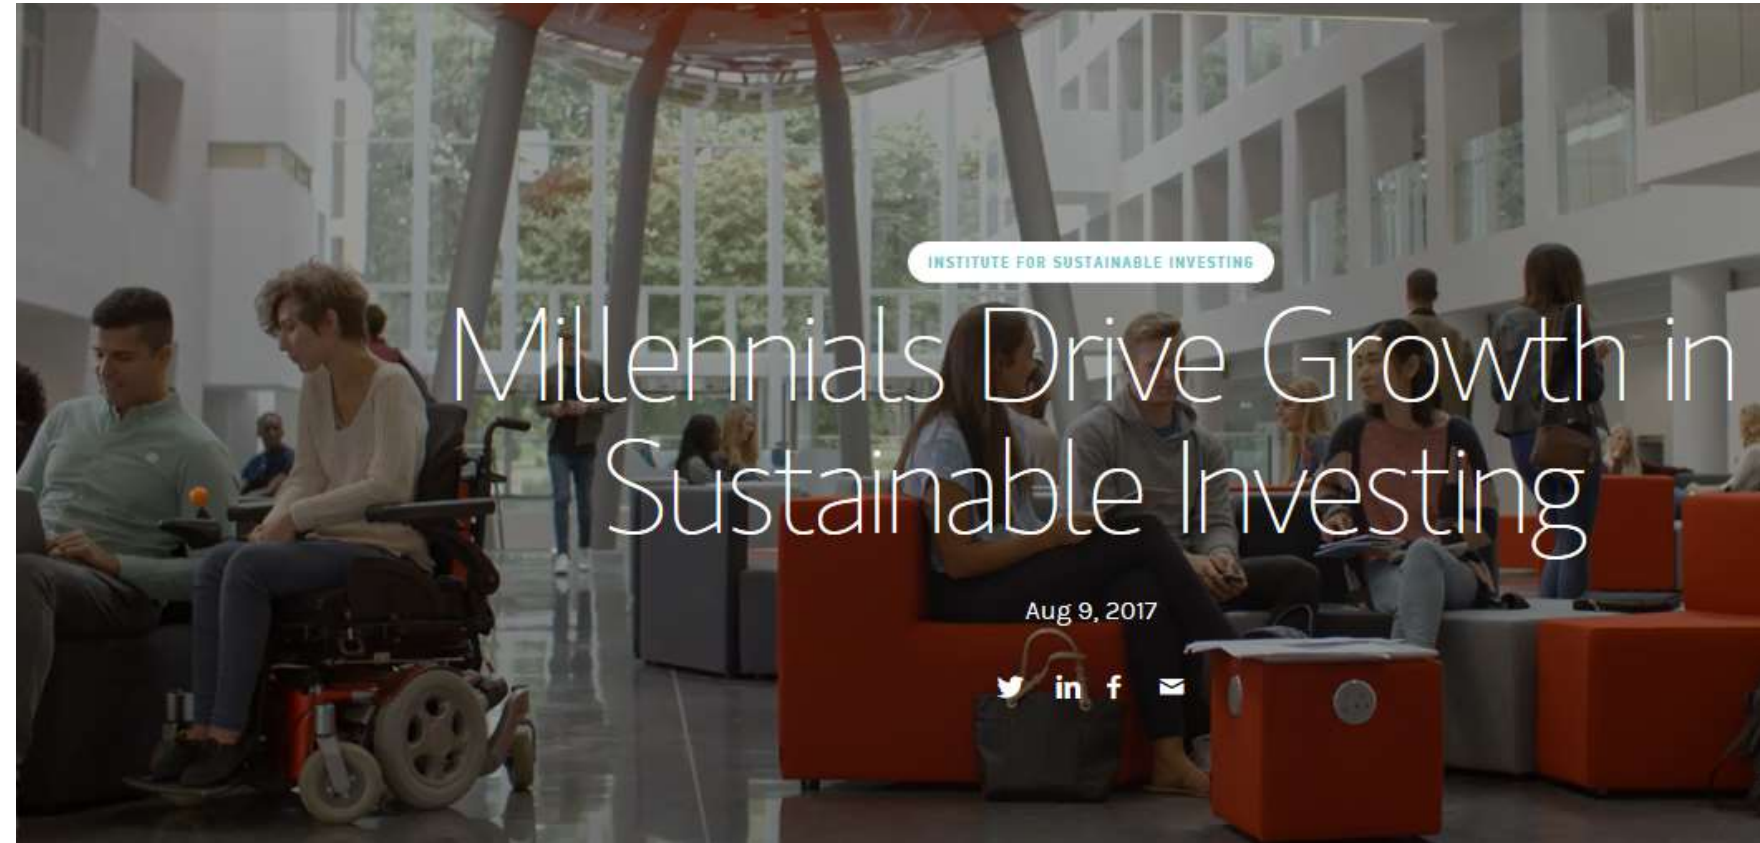

Millennials are **2X as likely** as the overall investor population to invest in companies targeting **social or environmental goals**

Millennials believe their **investment can create positive change**:

75 %
say their investments **can influence climate change**

84 %
say their investments **can help lift people out of poverty**
